

You really have to be tough to survive in the Australian desert.

uni **POWER TANK** eco

When a volunteer from Earthwatch Institute stumbled across an Earthwatch PowerTank pen that had been dropped on a desert expedition two years earlier, she was very surprised that it worked straight away. Daytime temperatures had reached 49 degrees, night-time temperatures freezing.

PowerTank Eco – the heavy duty ballpoint pen. A pressurised ink barrel means that it will write upside down, in extreme cold up to minus 20 degrees and keep on writing until the very last drop of ink. The barrel is recycled and the grip is made with sawdust reclaimed from the pencil making process.
